A: If you are using ESITronic as a KMS (Key Management System) - you can search google for "Bosch KTS - KEYS" - the KEYS are the keystore that allows you to generate a KMS using KEYS. So if you want to clone KEYS you need to be a registered member on the appropriate sites to gain access to the KEYS. They are not free and a lot of KEYS can cost \$10-\$100, but they are very good. I usually use the KEYS in combination with DD-WRT on my internet connected router and the KEYS I generate on my PC and then copy them over to the router. After a while they will get old and should be replaced with a new set, but you can keep them forever on your PC.
