But, as the author stated, the license doesn't support newer versions anymore. Maybe that's the reason why you get the "No license found" error. I think all you need to do, is to "Update" the Vray file to the latest version. (Of course, this only works when you have the correct file path, and if you don't create an installer, you need to do this manually.) Q: htaccess redirecting subdomain to subdirectory in another domain I'm trying to redirect the following: to: I am using a wildcard DNS entry on my registrar, so it's not subdomain.domain.com Here's what I have so far: RewriteCond %{HTTP_HOST} ^(www\.)?subdomain\.example\.com$ [NC] RewriteCond %{REQUEST_URI} ^/subdomain/(.*)$ RewriteRule ^(.*)$ [R=301,L,QSA] I've also got a bit of an issue with my.htaccess file. I need the root directory to remain / for all other sites so I've tried the following, but it's still throwing a 404: RewriteCond %{HTTP_HOST} ^(www\
