Keymacro allows you to create macros and hotkeys in any document, image, website, or application you have using Windows. Windows Keywords is a window that displays a list of every keystroke, function or website on your computer or that you have saved as a keyword. Keymacro can perform multiple actions in one hotkey. For example, if you press the [alt] and [ctrl] keys you can use one hotkey to: - Make [alt] and [ctrl] keys invisible - Make all of the text on the page you are viewing bold - Send email to "abc@xyz.com" - Play a specific song from your CD collection - Open a file using "My Documents" Windows Keywords is a window that displays a list of every keystroke, function or website on your computer or that you have saved as a keyword. Windows Keywords is a window that displays a list of every keystroke, function or website on your computer or that you have saved as a keyword. Keymacro can perform multiple actions in one hotkey. The keyboard macro tool allows you to easily set keyboard shortcuts for all the programs included in the package. This saves time, as you no longer need to type them every time you want to execute a specific action. For example, in order to create a new webpage in your web browser, you can select the desired browser and then use the keyboard shortcut for its creation. WallpaperWebPage does not include any system-specific programs or hidden files. The desktop icons are created using the usual Windows icons with transparency, which allows for the various file types to be used. [b]Program Features:[/b] - - - What's New in Version 2.0.0 - Fixed WallpaperWebPage 1.1.0 crash when trying to close it - Fixed WallpaperWebPage 1.1.0 crash when trying to start from the context menu - Fixed WallpaperWebPage 1.1.0 when you want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Added WallpaperWebPage 2.0.0 help text - Added WallpaperWebPage 2.0.0 help text - Fixed WallpaperWebPage 2.0.0 when you want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Fixed WallpaperWebPage 2.0.0 when you do not want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Fixed WallpaperWebPage 2.0.0 when you want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Fixed WallpaperWebPage 2.0.0 when you do not want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Fixed WallpaperWebPage 2.0.0 when you want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Fixed WallpaperWebPage 2.0.0 when you do not want to start from the context menu and do not type in the URL (Windows Vista, Windows 7) - Fixed
