
ORGADATA LOGIKAL.64 bringera

LogiKal is available in 4 languages: English, Russian, Spanish and Italian. History The predecessor to LogiKal was developed by ElvasC in the first years of the 1990s and was named Elva, the architecture software of the company. The company ElvasC was founded by Marco D'Ippolito, Marko Avsenik and Ivan Tomaševič and developed a product for the Architonic Architects' design of the Neu Naturhausen in Germany. In the late 90s, the product was renamed to LogiKal. The "Logi" prefix was added to pay homage to the name of the architect. Marko Avsenik, Ivan Tomaševič, Marco D'Ippolito and Ivan Šrejka founded LogiKal in 2000 and it became the first Austrian company in the window and door industry. The first version of the software was a PC application, available for Windows operating systems. It was programmed in DELPHI, developed in Slovenian at the time. In 2013 LogiKal released LogiKal 4.0, the first user interface with a graphical user interface. With this new version LogiKal 4.0 introduced the modular architecture in the form of four modules. One of these modules was the module for archising, the other was the module for analysis, the third module was the module for making windows and the fourth one was the module for mounting windows and doors. The company also released in 2013 a new version of Elva Studio, the company's design software. LogiKal 4.0 is the last version which will be available for Windows. From 2016, the company will focus entirely on the LogiKal Platform. LogiKal Platform On 28 March 2012, LogiKal GmbH has announced the opening of a pre-commercial funding round for LogiKal 4.0. It will be financed by among others SINGER Deutsche Industriebanken GmbH. The funding round is reported to raise around €1.7 million and will be used to complete the development of the new product and to complete the platform for the future. The funding round will be completed during 2012. On 8 October 2013, LogiKal released a cloud version of the LogiKal 4.0 Platform for Windows. The platform supports design and CAD data, communication between clients and users and the
