Category:Video game modsQ: how to update a combobox in wpf through databinding I am trying to update a combobox in wpf through databinding. I have a table with a bunch of fields (Name, Address, State) and the client wants to have a combobox which contains the states. For now I have a combobox, a list of states, and a datagrid. I want to be able to just hit a button and select a state from the combobox, and have that state automatically show up in the datagrid, I currently have this: public void UpdateDisplay(object sender, EventArgs e) { stateItem.DisplayMemberPath = "State"; stateItem.SelectedValuePath = 2d92ce491b
