Easy WebTV And Radio Crack+ With Registration Code Free (2022)

Easy WebTV And Radio is a software solution designed to provide a comfortable way to watch online television and listen to online radio stations straight from the desktop. While it boasts a huge collection of streams and links, Easy WebTV And Radio is not so easy to use, mostly due to its complicated interface. The menus are pretty intuitive, but the overall look seems a bit unprofessional, so you may need a few minutes before figuring out how to use the program. Besides web TV and online radio stations, Easy WebTV And Radio also comes with a built-in media player, thus providing the possibility to play your local media files on the go. Plus, there's a so-called "Games" menu that includes several hundreds of Flash games, all accessible via the main interface of the app. On the good side, the program boasts an impressive collection of TV stations organized by country, with a dedicated favorites menu to help you save the channels you like the most. While there's no search feature to lookup a given station, Easy WebTV And Radio comes with a separate utility for playing other URLs beside the ones included in the standard package. Another interesting feature is the so-called "Live Update" tool that automatically searches and downloads new updates, including new TV and radio stations. On the downside, some of the streams didn't work during our testing, while the quality of the video may also depend on your Internet connection. Overall, Easy WebTV And Radio is a decent application, but it still needs a few updates here and there. The interface is definitely the first thing that needs to be revised. Not really By Michael I was hoping that it would work... but I am stuck with a frustratingly slow streaming/freezing issue. Not really worth downloading. Unreliable By Rob I purchased the program and it's not really easy to use and is very inaccurate. It locks up a lot for no reason. Streaming with it is not worth the effort.
