Drive Blocker is a software application that prevents your computer from accessing the drives on your computer if the computer is disconnected from a network. The program does not actually remove your drives, instead, the drives are disabled to block access to any removable devices connected to the computer. The program will only work if the computer is connected to a network. If the computer is not connected to a network, then the drives are disabled and cannot be used. You can install Drive Blocker free of charge or pay a one time fee to continue using the program.
