If, however, you're very serious about saving important recipes, then surely a good recipe organizer/manager is one of the best ways to go about it. Birds Kitchen is a React and Electron-based, cross-platform application (works on Windows, Linux, and macOS) that allows you to save, manage, and thoroughly organize your favorite recipes. Do I really need a desktop app for this? Well, that depends. If you have just a few recipes, then the answer is probably "no." If, however, you have more than a dozen recipes, then Birds Kitchen starts to make sense. The best aspect of Birds Kitchen is the fact that you are provided with a plethora of useful tools for organizing and finding recipes. For example, you can search for a recipe based on its contents, you can use tags, you can add them to various categories, you can rate them, add them to a Favorites section, and even search for them via the source URL. The app is also very good when it comes to printing your recipes. You can change the ingredients and the amounts fairly easily in order to adjust the servings, and print
