

2.2.2 Ladder editor. This section explains the layout of the GX Works2 Ladder Editor screen and its basic operations. (1) Edit screen. The screen consists of two parts. The sides of the screen show I/O and settings panels. At the top is the settings panel. It lists all objects selected in the table. The right side of the screen shows the objects that should be visible on the screen, as well as their current state. At the bottom of the screen are the editing screen control keys. (2) Ladder editor. The screen consists of two panels - one shows the relay contacts, the other shows their connections.
