First, you need to download the plugin. 2. Next, you need to extract the plugin's ZIP archive (usually it will be inside a folder named "Saved Plugins" or "My Plugins") into the Lightroom/Adobe/LR5/Plugins directory. 3. Now, the plugin can be used right after installation. In the case that you have the LR Plugin Bundle, you can install it by double-clicking the icon on the LR Plugin Bundle. 4. Make sure to install the plugin by clicking the yellow button 'Install' (as shown in the pictures) In the case that you have installed the plugin, your Lightroom is now ready to install the plugin's presets. After installation, you can also access your plugin's presets in the Presets dialog in Lightroom. 5. In the case that you installed the plugin from the LR Plugin Bundle, you can simply double-click it (either in LR or in a Plug-Ins panel), to open the plugin's presets. Important: please note that the plugin's presets require the corresponding version of the LR module to be installed. To find out which version of the LR module you have, please see the LR version you are using (in the Presets dialog). Installing presets Lightroom presets are stored in the Presets dialog, which can be found in the Edit tab of Lightroom. In the case that the plugin does not support presets (some plugins do not support presets), you can open the plugin's plugin

---
