Process: This is the front end that enables you to view, make edits to, and save your image. **Backstage:** This is the workbench area where all the tools are found that enable you to make your edits. **Layers:** This is where the different elements are to be found in your picture, including the tools you use to manipulate them. Although you probably never need to resort to the third-party applications that allow you to remove everything from an image, sometimes they can come in handy and are worth knowing. The following sections describe the features of each of these sections. ## Exploring the Process Area You can access the process area by clicking the slider menu at the top of the window, as shown in Figure 9-1. You can also find the process area by choosing Window⇒Process (Windows) or Window⇒Processing (Mac). FIGURE 9-1: Use the slider menu to access the process area in the top-left corner of the window. The process area offers several features. You can use the following buttons to make changes: **Crop:** This tool, the primary aspect-crop tool in Photoshop, crops your image to the desired aspect ratio. For example, if you want the image to be 3x2 inches, but the camera set that at 5x7, you have to use this button to set the actual crop area at 3x2. **Resize:** Click this tool to resize your image to a specific size. **Background:** This tool, available in the Image Adjustments/Background submenu, allows you to remove any background elements from the image so that only the subject is shown. **Trim:** When you use the Trim tool, you can crop away some of the edges in the image — that is, you can add a border to a picture so that only part of the image is seen. Peoria's tourism board is hoping an idyllic property photographed on the Arizona Central train line will generate more than just online attention with the Marchant Hotel & Spa's new 18-room South Peoria Inn & Suites. The South Peoria appears in the city's "Where to Stay" section, but it's not in the "Things to See & Do" section. Although publicizing the hotel was a challenge, getting it to stand out from more traditional Peoria hotels didn't. "We've been able to check the availability of the South Peoria at the main hotels in town. It is our biggest challenge in getting the South Peoria out there," Lowe said. But it was worth it. The South Peoria has 32 square-foot rooms that include rates ranging from \$89 a night to \$269 a night. The location can't be beat, being right along the Amtrak line, Lowe said. In fact, when she showed the property to a business traveler, the
