Teams, formations, and players are now forever in your Ultimate Team. Now you can customise your squad and compete with your friends online for the best player ratings and team combinations. You can even create your own customisable player card to make your team truly unique, like in previous FIFA games. Improved Player Intelligence - Its harder to score and easier to defend than ever before, and now players will always want to play in your best position. Individual defenders will properly assess a situation, making them harder to beat. As a player, your intelligent on-field decisions will determine the flow of the game. Experience Points - You will now earn Experience Points based on your play. Get three stars and progress through the tiers in the Ranking System, and you'll unlock rewards based on your total Experience Points: Trophies for reaching a certain level of Experience Points, new player cards, and overall new items for your FIFA Ultimate Team. VAR - Now let the good (and bad) calls on the field stand. VAR will help referees make the right decision in real time, whether it's a goal review, penalty kick, or card decision. DELAYED REVIEW - One of the reasons EA have introduced VAR is to ensure that the decisions on the pitch are more accurate. With VAR in play, with a video referee on the sidelines, the referee has the benefit of knowing what's really going on, right in front of him, and can call the correct decision instantly. As a player, when the referee makes the right call, your team doesn't miss a trick - you gain bonus Experience Points, and you can feel comfortable knowing you've done everything in your power to help your team. When the referee makes an incorrect call - the player commits an infringement and is reduced in Experience Points. When an incorrect call is made, the player will get a booking, kick, or card. STADIUM PROJECTIONS - Better visuals, more animations, and quicker speeds, as you build the dream stadium of your dreams. The new Stadium Projections engine also improves the visual fidelity of your stadium - with the detail reflecting the exact dimensions of your stadium. Not only will the stadium look bigger than ever before, it'll also feel bigger. Dynamic Player Faces - Now your players can make their own unique style, with new animations and more than 50 pre-defined player faces. FIFA have also introduced pro-level looks,
